

System Guide

Quantum Dev Team

Company Website & Management System

Version 1.1 • 2026-07-15

Client Documentation

1. System Overview

The Quantum Dev Team system is a complete, bilingual (Arabic & English) web platform made of two parts: a **public marketing website** that showcases the team's services, projects and members, and a full **admin dashboard** that lets you manage all site content without any technical work.

It is built to modern software-engineering standards with a focus on performance, security, user experience and future scalability.

2. System Sections

A. Public Website (visitor-facing)

Section	Description
Home	An engaging landing page: team intro, services, featured projects, testimonials and animated statistics.
About	The team's vision, fields of work, message and management team.
Services	Detailed presentation of the technical services offered.
Projects	Portfolio with category filtering and a details page per project.
Blog	Technical articles that build authority and improve search visibility.
Team	Team members with their roles, skills and professional links.
Contact	A direct contact form (delivered to the dashboard) plus a floating WhatsApp button.
Request a Project	A smart intake form (type, timeline, description).

B. Admin Dashboard (management system)

Section	Description
Dashboard	Overview with KPIs, a content chart, and recent activity & messages.
Projects	Create/edit projects with cover, gallery, technologies, categories and tags.
Services	Full control over the services, their order and status.

Team	Manage members, roles, skills and photos.
Blog & Content	Manage articles, testimonials and FAQs.
Technologies / Categories / Tags	Lookup lists used to classify projects and articles.
Messages & Requests	Receive and track contact messages and project requests, with Excel / PDF export.
Users & Roles	Manage admin accounts and their roles (super admin, admin, content manager, editor).
Settings	Control the logo, contact info, hero text and statistics.
Trash	Restore or permanently delete removed items.

3. Key Features

- **Bilingual:** full Arabic & English support with instant switching and correct text direction (RTL/LTR).
- **Responsive:** works smoothly on mobile, tablet and desktop.
- **Dark mode:** comfortable day and night.
- **SEO:** sitemap, clean URLs and social-share metadata.
- **Security:** multi-level permissions, spam-protected forms and encrypted data.
- **Activity log:** tracks every admin action (who did what and when).
- **Performance:** automatic image compression, persistent cloud storage and fast loading.
- **Notifications:** instant email alerts on new messages or project requests.

4. Development Phases

Phase 1 — Analysis & Planning: understand requirements, define sections, design the database. Completed

Phase 2 — Design: UI, visual identity and user experience. Completed

Phase 3 — Development: build the public site and the full admin dashboard. Completed

Phase 4 — Testing & QA: automated tests plus performance and security review. Completed

Phase 5 — Deployment: ship to the cloud (Render) with a PostgreSQL database. Completed

Phase 6 — Support & Continuous Improvement: new enhancements and monitoring based on feedback. Ongoing

5. Technical Stack (at a glance)

Framework	Laravel 10 (PHP)
Database	PostgreSQL / MySQL
Front end	Blade + Tailwind CSS + Alpine.js
Hosting	Render (Docker) + Cloudinary image storage
Security	Spatie Permissions + CSRF & form protection

6. Changelog

Version	Date	Updates
1.1	2026-07-15	Branded covers with project/article names, an English guide, and in-dashboard downloads.
1.0	2026-07-15	Initial release: full public site, admin dashboard, About page, WhatsApp button, timeline field and Cloudinary image storage.
